

UMR 6538 OCEAN GEOSCIENCES LABORATORY GEO - OCEAN UBS

Geo-Ocean UBS is a laboratory dedicated to conducting research in various marine domains, including geology, geophysics, geochemistry, sedimentology, and paleontology. This particular section of Geo-Ocean focuses on coastal and littoral environments. Our team brings extensive expertise and conducts research on a wide scale, participating in projects at regional and international levels.

Our research at Geo-Ocean UBS revolves around three main topics:

- ✦ Observation, dynamics, and quality assessment of littoral and coastal systems.
- ✦ Sedimentary archives and paleo-environments.
- ✦ Sedimentology of coastal and littoral seabeds.

In addition to these areas, we also possess expertise in remote sensing and photogrammetry techniques.

TEAM

18 Members :

- 7 Researcher
- 2 Doctoral student
- 6 Engineers

EDUCATION

Doctoral school : Coastal and Marine Sciences

Master : Coastal Resources Engineering and Management

DOMAINS OF APPLICATION

Marine sciences
Geochemistry
Geology
Geophysics
Paleoclimatology
